allocacoc a different standard

We value customer experience

We understand that customer experience and comfort are vital to your business. With our products, we ensure that their experience and comfort are upgraded to a different standard.

Never run out of sockets

With the rising importance of gadgets, power sockets have become one of the most important things that people look for. With PowerCubes, guests can plug up to five devices at once.

Dual USB ports Equipped with two USB 2.1A ports, it is perfect for guests to fastcharge devices such as smartphones and tablets.

Improve your interior design
People tend to hide their power strips. With PowerCube, you would want to show it off as decoration, while making your workspace tidy and beautiful in one go.

Easy to install

With a docking system, the PowerCube can be mounted on any flat surface: on or under the table, or on the wall - the possibility is endless. The dock is easy to install, either with removable sticky tapes or with screws.

Different connectors

Besides the traditional electrical wall plug we offer many other connectors depending on your room requirements.

Specifications
